

ADRIAN FANG
SOPHOMORE AT THE UNIVERSITY OF CHICAGO
◇ apfang@uchicago.edu ◇

EDUCATION

- **The Dwight School** (New York) - IB (International Baccalaureate) Diploma Program, Class of 2025; GPA: 4.0
- **The University of Chicago** (Chicago, Illinois) - Undergraduate Student Class of 2029 - (Relevant Coursework: Analysis in R^n III, Systems Programming II, Honors Basic Algebra)

QUANTITATIVE MODELLING, AI AND SYSTEMS RESEARCH EXPERIENCE

University of Chicago Summer Student (Data Science in Quant. Finance and Risk Management) 7-8/2024

- Analysed financial and market data for quantitative research used probabilistic and statistical methods to assess uncertainty, risk and distributional behaviour in asset returns
- Explored and built quantitative models for automated position sizing, portfolio construction, and risk management, particularly paying attention to tail risk and model assumptions
- Applied Python-based data analysis tools (Pandas, NumPy, Scipy, Scikit-Learn) to evaluate trends and stress test quantitative strategies and Collaborated on final project to simulate real world market decision-making

Independent Software and Security Engineer 06/2020 - present

- Built analytical and automation tools primarily in Python, exploring system behaviour, performance trade-offs and data driven decision making
- Worked across different areas including data analysis, cryptography, secure software design

Independent Cybersecurity Researcher 11/2020 - present

- Conducted ethical investigative vulnerability analysis of web apps and complex systems in order to identify and patch hidden risks, failure and security weaknesses, developing intuition for how systems behave under stress
- Used Offensive Security knowledge in a controlled, ethical environment to improve reliability, integrity of systems, considering technical documentation, system behaviour edge cases and ethical disclosure and remediation
- Earned GIAC Foundational Cybersecurity Technologies (GFACT) certification with a 99% exam score from National Cyber Scholarship in 2023, demonstrating strong foundation in systems, risk and adversarial security principles
- Ethically discovered and disclosed a system vulnerability acknowledged by Cambridge University. See Public Acknowledgement: www.cambridge.org/legal/security-and-vulnerability-disclosure-policy/acknowledgement
- Discovered, ethically disclosed and currently remediating a critical security vulnerability in iNaturalist.

Existential Risk Laboratory @ UChicago (XLab) 1/2026 - present

- Engaged in discussions and readings on technical papers heavily involved in AI Safety, security and policy.
- Learned technical workings of important concepts in LLMs and their integrations into the modern economy.
- Fellowships establish a strong foundation on the pressing concepts within AI safety, specifically how economics shape AI safety decisions, vice versa, along with technical and safety challenges in research, governance, and policy.

LEADERSHIP AND COMMUNICATION EXPERIENCE

XLab - Fundamentals Facilitator Remote, Chicago

- Hosted weekly 2-hour remote sessions to incoming UChicago students, introducing them to AI Safety, how AI works from a technical standpoint, and facilitated and participated in discussions to push critical thinking, free thought and questions regarding the implications of AI's developments and current improvements.

Cybersecurity Club (Founder, President, Dwight Hackers) New York City, New York, 10/2023 - 2/2025

- Taught Cybersecurity skills to high schoolers in grades 9-12; Students could legally, ethically learn Offensive Cybersecurity through interactive activities, focusing on analysing/mitigating risks to solve problems with ethical reasoning

Jeff Metcalf Intern for Quality Assurance + Software Dev @ Top Marks Prep Remote, 3/2026 - Present

- Engineered software to automate the quality assurance work of improving integrity of datasets as part time spring work, increasing my productivity by over 10x, and will dive into software engineering work for the summer
- Collaborated with other engineers and administrators in my projects in order to ensure the swift and smooth integration into the company's infrastructure

AWARDS & DISTINCTIONS

- **3 × Excellence in Mathematics (Grades 10-12, New York)** - Distinction for the highest mathematics achievement across advanced coursework; Received the award for mathematics in grade 12 to signify excellence across entire school; In UChicago's Undergraduate Real Analysis Sequence
- **National Cyber Scholar with Honours 2023** - Participated in Cyberstart America Competition; finished within top 1-7% of participants nationally; Won \$3000 scholarship of Cybersecurity Training; Scored 99% on the GIAC Foundational Cybersecurity Technologies (GFACT) exam, gained honours distinction
- **IB MYP (Middle Years Programme) Personal Project Product Award (Grade 10)** - Developed and documented a large scale technical project; submitted internationally for external IB examination; received highest possible evaluation
